## WASHINGTON MATTERS.

A COMMODORE DIES.

Washington, Aug. 5.—Commodore W. E. Fitzhugh died in the hospital of the Naval home, at Philadelphia, Saturday, aged 55 years. His death marks the following promotions: Capt. Joseph S. Skerrett, to be commodore; Commander Henry F. Pickens, to be captain; Lieut. Commander T. A. Lyons, to be commander; Lieut. E. C. Pendleton, to be lieutenant commander.

## APPOINTMENTS.

The president to-day appointed John R. Pitkin, of Louisiana, minister to the Argentine Republic.

The president has tendered the appointment of collector of the port of New Orleans to ex-Gov. Warrington, of Louisiana. The president appointed John S. Thayer, naval officer at New Orleans.

The following presidential postmasters were appointed: Henry H. Krauss at Reno, Nev.; Vice J. C. Hagaman, removed; Robert Dunn at North Yakima, W. T.; Vice G. W. Carr, resigned; Thomas B. Warren at Spokane Falls, Mont.; Vice J. J. Pelee, resigned; Josiah A. Small at Aspen, Colo.; Vice James C. Conner, commission expired; John C. Sullivan at Durango, Colo.; Vice J. M. Hollister, resigned.

## COMMISSIONER TANNER'S REPORT.

Commissioner of Pensions Tanner has made public a statement of the number of cases made "special" from the date he assumed charge of the pension office, March 27, up to the 23d of July. It shows that during that period there were made special 108 claims. Of this number the commissioner had 152 from files examined to ascertain who were the attorneys in the cases. Results show, among other things, that there were 118 cases in which there were no attorneys; that George F. Lemon was attorney in ninety-eight cases, and William W. Dudley in five. The commissioner then named eleven other attorneys who had cases made special in numbers ranging from twenty-six down to eight. The above aggregate 355 cases. The balance of the cases, the commissioner says, are distributed among various other attorneys, no one of whom is attorney in as many as eight cases. Three hundred and seventeen attorneys are represented altogether.

## PAIN TALK ON "CORNERS."

WASHINGTON, Aug. 5.—The state department is in receipt of the elaborate report upon the Russian agriculture and cereal trade, from United States Consul General Avery, at St. Petersburg. He says the exports of cereals from Russia in the past two years show abnormal increases, due to three causes:

First—Enormous crops gathered from both black lands and arable prairies.

Second—Depreciation of paper ruble.

Third—The foolish practice of the system of corners in the United States.

"The arable lands of Russia, in Europe," Mr. Avery says "excluding Poland, cover an area of 450,000 square miles."

The wheat grower of Kansas and Dakota will see at a glance the area of that fertile territory, which with the cheap labor of Russia will always prove to be a formidable rival, and merchants of Chicago and New York, who imagine, by cornering wheat, that they control the markets of the world, can always find into their calculations the product of this country as an effective check to their aspirations. Every corner engineer in the United States makes an opportunity for Russia. Not \$1 is added to the import of wheat from America, but the exports from our country being stopped, Russia steps in and gets rid of her surplus below remunerative prices, but still far below the prohibitive values established in Chicago and New York. As long as Russian wheat exists any attempt of the western nations to force Europe to pay artificial prices for American grain can but result in absolute failure. Perhaps if this fact be known corners would become rare and infrequent.

## An Official Expression.

OTTAWA, Ont., Aug. 5.—The Citizen, the government organ here, which, hitherto, has been silent on the Behring sea question, says in an editorial column:

"If the present government at Washington fails to see about the serious complications between the imperial government and the United States it will not be because no effort has been set forth to produce so undesirable a result. The truth is that statesmen of the caliber of Webster and Clay do not now reach maturity in the southern portion of this continent. Peddling political news, seeking notoriety, professors of brag and duplicity appear to have monopolized all places of importance and now intent on forcing issues with a country which its people are rapidly learning to despise them, not fear them. The recent shameful act of piracy committed on the Canadian vessel in Behring sea is absolutely unjustifiable, and has only one redeeming feature, namely, that it will bring the whole question under consideration, and the Washington authorities will be obliged to apologize as well as recoup the owners of vessels they interfere with. If this is not done, what is left of the Yankee naval effects will probably disappear from more seas than the Behring."

## Heavy Rains.

New York, Aug. 3.—Notwithstanding the fact that it has been raining almost steadily since a week ago yesterday, there is still no sign of clearing weather. At 8 o'clock this morning the rain fell in torrents for about fifty minutes, and flooded the streets and cellars of this city and Brooklyn, accompanied by heavy thunder and lightning. Nearly two inches of water fell. A dispatch from New York, Mass., says the same storm visited that section of the country, and sewers were washed out, cellars flooded, streets gullied and factories compelled to suspend operations. At 2 o'clock the most severe storm of the season is raging at New York. The streets are flooded and travel and business suspended.

## A Proposed Cotton Mill Trust.

FALL RIVER, Mass., Aug. 5.—The English papers publish a letter from a committee representing an English syndicate, addressed to the presidents of all the cotton mills in Fall River, which proposes to form a cotton mill trust. It is stated that the foreigners have subscribed more than enough capital to buy the entire cotton manufacturing plant of the country. The Fall River mills alone have a capital exceeding \$20,000,000, and the investment would be probably 30,000,000 or more.

## Their Business Booming.

Probably no one thing has caused such a general revival of trade at C. M. Greener's drug store as their giving away to their customers of so many free trial bottles of Dr. King's New Discovery for Consumption. Their trade is simply enormous in

this very valuable article from the fact that it always cures and never disappoints. Coughs, colds, asthma, bronchitis, croup, and all throat and lung diseases quickly cured. You can test it before buying by getting a trial bottle free, large size \$1. Every bottle warranted.

## California Brandy Distilleries.

SAN FRANCISCO, Aug. 5.—Yesterday a number of prominent capitalists met a committee of the Grape Growers' association and discussed a plan for relieving the wine industry of the state by distilling the surplus wine into brandy. It was agreed to organize a company with a capital stock of \$1,000,000. The company will be known as the California Brandy Union Distilleries, to be located in the state where cheap grapes and wines are found in excess. A central bonded warehouse will be established in San Francisco. Agencies will be located in all the eastern cities, Hamburg and London. Of this year's surplus the company will buy \$2,000,000 gallons, which they will distill into 50,000 gallons of brandy.

## IRRIGATION SPECULATORS.

Demand for Western Farm Lands—See Noble Lays Down the Law.

WASHINGTON, Aug. 5.—Sec. Noble, of the interior, has received a telegram from Gov. Shoup, of Idaho, setting forth a resolution passed by the constitutional convention stating that speculators are following the United States irrigation surveying parties taking up valuable water rights.

In reply Sec. Noble quoted the provisions of the law providing for the surveys now in progress, which he thinks cover the ground and protect water rights. Among other things this law provides that all lands which may hereafter be designated or selected by such United States surveys for irrigation purposes, and all lands made susceptible of irrigation by such reservoirs, ditches or canals, are from this time henceforth hereby reserved from sale as the property of the United States, and shall not be subject after the passage of this act to any further settlement or occupation until further provided by law; providing that the president at any time in his discretion can by proclamation open any portion or all of the lands indicated by this provision to settlement under the homestead laws.

The secretary points out that it is impossible for speculators to acquire a large area of land while this law is in force, and adds this: "Parties entering upon these lands in either territory will be subject to the superior title and future control of the United States. I have directed the commissioners of the land office to notify the local officers of this law and prohibit entries of the kind you specify, and I have also ordered the superintendent of the geological survey to proceed rapidly with the surveys of Bear River. The statute you observe, reserves the assistance of the general of the department agrees with me that it is constitutional and effective to the extent expressed. I fully appreciate the conflict of rights that must arise between the territories and the states, but these all can and will be better regulated by national control than by local conflicts and contradictory legislation."

## Starving Children.

SPRING VALLEY, Ill., Aug. 3.—Two children belonging to the wife of one of the locked up miners died here yesterday. Physicians who attended them pronounced it a clear case of starvation. The mother had but little food in the house and was unable to provide sufficient nourishment for them.

## Cause and Effect.

SALT LAKE CITY, Aug. 3.—The Ore Producers association passed a resolution at its meeting last night reciting that the duty on lead ores provided by law was evaded, and in 1888 50,000 tons of lead ores were brought into the country duty free. That still greater importations are threatened in 1889. They call on the president and the treasury department for prompt and decisive action in the interest of mining and to the advantage of revenue.

City of Mexico.—The lead mines in Nuevo Leon are shutting down, owing to the imposition by the United States government of duties on lead ores.

Damage to Crops by Floods.—New York, Aug. 5.—Dispatches from many points in the farming districts within a radius of 100 miles of this city, show general damage to crops by the unusually heavy rains of last week. The total losses in New York, Connecticut and New Jersey will amount to between \$300,000 or \$400,000, or perhaps more. The hay, potato and small fruit crops suffered much.

Elizabeth, N. J.—The damage by the storm in Essex county is estimated at \$300,000.

## The Jesuits' Estate Act.

QUEBEC, Aug. 5.—A deputation yesterday presented a petition to the governor general asking him to disallow the Jesuits' estate act recently passed by the Quebec legislature granting \$500,000 to Jesuits, or to dissolve parliament in order to give the constituencies an opportunity to express their opinion.

The governor general stated that in his opinion there are no grounds for the disallowance or the dissolution of parliament.

## An Epidemic in Illinois.

CARTHAGE, Ill., Aug. 5.—An epidemic of dysentery has appeared at Warsaw, in this county. Fifteen people have died. The victims are mostly children. One hundred and eighty cases are reported, of which it is feared many will result fatally. The people are terror stricken. The disease also appeared at Hamilton, and it is said to exist in an epidemic form at Canton and Kahokia, Mo.

## The Coke Strikers Weaken.

PITTSBURGH, Aug. 5.—The coke strikers are weakening. Already the strike promises to be a failure. The men at the Youngstown, Moorwood and Standard works, numbering 1,000, went back Saturday. The overseers say by the middle of this week work will all be in operation again.

## The Murder of an Editor.

## ARE YOU LOOKING

For a place you can call home? You are tired, perhaps, of "quarter-section farming," even though broad acres of the finest portions of Uncle Sam's domain tempt you to change your base of operations further west. Ten, twenty, thirty or forty acres of Rio Grande valley land will furnish you an ample and varied arena for the display of muscular ability, while common sense, taste and a modest capital will in three or four years produce results eminently satisfactory to a man who, to a laudable desire for a reasonable pecuniary return for his labor, carries with it a purpose that the balance of his days shall, with his family, be spent amid pleasant and healthful surroundings.
